**LETTER OF TRANSMITTAL**

Sir:

In response to the Office Action mailed March 8, 2007, please enter and consider the enclosed new Petition to Revive, Amendment After Final (Corrected), and Request for Continued Examination (RCE).

On May 2, 2007, a response was submitted to a dismissal for a Petition to Revive unintentionally abandoned application serial number 10/826,830 for Edmond Heng Lim. A Notice of Appeal, Appeal Brief, Amendment After Final (Corrected), and Request for Continued Examination (RCE) was submitted along with check # 2267 for \$250.00 as payment for the Notice of Appeal and check # 2266 for \$395.00 as payment of the RCE. The Appeal Brief showed good cause to support that the dismissal was improper because the reply submitted with the Petition was fully

responsive to the grounds of rejection of the previous Office Action. The dismissal cited new grounds of rejection the applicant was not previously made aware of and held that the reply was therefore Non-Compliant.

Therefore, the applicant believes the Petition should well have been granted. The RCE and payment thereof submitted with the Notice of Appeal should allow prosecution to continue regardless of any new grounds that may be cited. This submission continues the request to reverse the dismissal and grant the Petition to revive the application. A copy of all correspondence submitted on May 2, 2007 is enclosed.

This Letter of Transmittal includes a new Petition to Revive, an Amendment After Final (Corrected) that is identical to that submitted on May 2, 2007, a RCE with payment (check #2268 for \$395.00) and payment of the new Petition to Revive (Check #2269 for \$750.00). If the previous submission does not result in a reversal of the decision to dismiss the previous Petition to Revive (i.e. revival) of the above-identified patent application, for any reason, please process the enclosed Petition. Applicant requests non-entry of any previously filed Amendment After Final.

Respectfully submitted,

Risto A. Rinne, Jr.  
Registration No.37,055
